

OPIOID STEWARDSHIP

The most comprehensive response to the opioid crisis.

cliexa's Mayo Clinic Platform-qualified OUD risk prediction, joined to OpiSafe's patented tapering and closed-loop referral — delivered as guided clinical workflows inside the EMR your teams already use. One system that moves with the patient instead of stopping at the score.

• THE CARE CONTINUUM

Identify

Predict opioid use disorder risk early, with explainable drivers.

Taper

Operationalize safe, evidence-based tapering and monitoring.

Refer

Close the loop to behavioral health and addiction care.

Manage

Document, monitor, and sustain engagement over time.

• THREE CORE CAPABILITIES

01 / RISK PREDICTION CLIEXA

AI-powered OUD risk prediction

Identifies adults at risk of opioid use disorder through predictive analytics and real-time clinical intelligence — four-tier risk stratification with explainable contributing factors, so clinicians see the drivers behind every score.

MAYO CLINIC PLATFORM-QUALIFIED · SURFACED IN-EMR

02 / TAPERING OPISAFE

Patented opioid tapering management

Turns evidence-based guidelines into individualized tapering schedules, progress monitoring, and documentation — reducing opioid exposure while keeping patients engaged and in continuity of care.

ISSUED & PENDING PATENTS · GUIDELINE-ADHERENT

03 / REFERRAL OPISAFE

Patented treatment referral & coordination

Streamlines closed-loop referrals to behavioral health, addiction treatment, and specialty care — connecting patients to the right level of care while satisfying documentation, quality, and payer requirements.

CLOSED-LOOP · PAYER-ALIGNED COORDINATION

• WHAT IT LETS YOUR ORGANIZATION DO

- + Flag patients at **elevated OUD risk before escalation** occurs.
- + Automate clinical workflows and documentation to **cut administrative burden**.
- + Enable **safer opioid tapering and deprescribing** programs at scale.
- + Deliver **clinical decision support** directly inside existing EMR workflows.
- + Run **evidence-based opioid stewardship** across every provider and site.
- + Strengthen compliance with **payer, regulatory, and quality** reporting requirements.
- + Widen **access to behavioral health** and addiction treatment via closed-loop referrals.
- + Move patients from **risk to treatment** on one connected, accountable pathway.

WHO IT'S BUILT FOR

Built for **health systems, provider organizations, health plans, employers, and government agencies** advancing value-based, evidence-based opioid care.

"The opioid crisis remains one of healthcare's most complex and costly challenges because providers often lack a connected pathway from risk identification to intervention."

MEHMET KAZGAN · FOUNDER & CEO, CLIEXA

ABOUT CLIEXA

cliexa is an AI-powered clinical intelligence platform that turns fragmented clinical, claims, and patient-generated data into action inside existing healthcare workflows. Its Mayo Clinic Platform-qualified OUD Risk Prediction solution helps organizations identify at-risk patients earlier and intervene proactively. **From Records to Reason.™**

ABOUT OPISAFE

OpiSafe provides patented technology for safe, guideline-adherent opioid prescribing, opioid stewardship, chronic pain management, and behavioral health coordination — helping providers, health systems, and payers standardize programs, improve safety, and enable evidence-based treatment pathways.

• VALIDATION

Mayo Clinic Platform Validated

cliexa's OUD Risk Prediction is Mayo Clinic Platform-qualified — independently validated for clinical readiness.

From Records to Reason™

A 20-minute walkthrough scoped to your organization. A peer-to-peer conversation, not a pitch.
